| Director                |      |                     |                    |            | Head of Engineering   |     |  |  |

## **PURPOSE**

## Main purpose for the post

- To provide leadership of the Operations Team in ensuring that observers are provided with working telescopes, instruments and systems for the night observing schedule.
- To ensure that ING equipment and infrastructure are properly maintained.
- As a member of the ING's management team, to contribute to the overall management, development and general direction of the observatory.

# Associated duties and responsibilities

- Assuming prime responsibility for handing over working telescopes every day to observers and ensuring they remain working satisfactorily throughout the night.
- Taking primary responsibility for ING's maintenance programme, leading maintenance planning in coordination with other engineering groups.
- Leading the Operations group, providing line management supervision of group members: agreeing yearly work plans, monitoring them during the year; ensuring that members of the Operations group have the skills, knowledge and resources required to carry out their tasks in a safe and efficient manner, and establishing and documenting a training programme for their personal development.
- Leading daily mountain observatory operations, chairing daily meetings and delegating routine and repair work.
- Chairing regular Operations meetings with telescope managers and representatives from engineering and astronomy groups to discuss previous faults, their status and remedies, together with future operational requirements.
- Taking responsibility for the management of budgets for operational infrastructure, development, transport and safety. Preparing budgets and balancing spend to allocation over the financial year.
- Taking responsibility for ensuring that operational documentation is accurately produced, is used and updated, including daily check lists, instrument changes, manuals and operation procedures.
- Keeping up to date with developments in relevant health and safety regulations and directives; assessing relevance and priority; and ensuring they are implemented or updated if applicable to ING's operational activities.

JD template v. 0.8en Page 1 of 3

- Taking a pro-active approach to addressing operation and maintenance issues, instigating and proposing improvements to ING procedures and strategic plans regarding operation and maintenance.
- Interacting with the Heads of all other ING Departments to contribute to the strategic direction of the Observatory, taking an active role in addressing issues either technical, managerial, financial, SHE or HR, when they appear.

## **Appointment**

Full time

## **Mobility**

Occasional travel to visit suppliers, to project meetings and project reviews.

# Remarks

The post holder is expected and encouraged to make use of his/her engineering expertise for the benefit of ING engineering activities, either maintenance, fault-solving, or development.

| RESPONSIBILITIES              |                          |  |  |  |  |
|-------------------------------|--------------------------|--|--|--|--|
| People management             | Annual budget management |  |  |  |  |
| Operations Group (~10-15 pax) | ~€300k                   |  |  |  |  |

## Results / Other
